

Triple Crown Senior Horse Feed Formula

A textured feed designed for the special nutritional needs of older horses.

Developed specifically for older horses, this formula features a higher nutrient content to compensate for a less than effective digestive system. A higher fat content provides the extra energy older horses need. Plus, it is softer, more easily digested and can be mixed with water to form a mash for horses who experience difficulty chewing and swallowing. Has enough bulk fiber to be used as the sole ration for horses unable to eat hay or pasture. It can also be used with good quality hay.

Feeding Directions

Triple Crown Senior is designed for horses that have difficulty consuming hay and traditional horse feeds in pelleted or textured form due to damaged or worn teeth. The nutrient concentration of Triple Crown Senior has also been adjusted to provide a greater allowance to older and other metabolically challenged horses that sometimes experience difficulty in digesting and/or metabolizing normal feedstuffs, minerals and vitamins.
