Feeding Directions

Triple Crown 30% Supplement can be used to balance pasture and/or hay, improve nutrition in diets when feeding small amounts, or to mix with your own grains for a balanced diet. Adjust feed, pasture or hay to maintain desired body condition.

For balancing pasture and/or hay, feed 1 lb. to 1.5 lbs. per 1000 lbs. of body weight. Feed .5 lbs. to .75 lbs. for ponies. For horses in moderate to high levels of activity, and for broodmares and breeding stallions, feed 1.5 lbs. to 2 lbs. per day. **For balanced diets where current feeding rates fall below the minimum** for that diet, add .5 lbs. to 1 lb. per 1000 lbs. of body weight along with the diet being fed. Feed .25 lbs. to .5 lbs. for ponies. For horses in moderate to high levels of activity, and for broodmares and breeding stallions, feed 1 lb. per day. **When mixing with your own grains** (oats, corn or barley), mix at a ratio of 1:4.5 of Triple Crown 30% Supplement along with your grains and add molasses, if desired, for palatability and consistency.
