

Triple Crown Premium Forage Cubes

Uses pre-bloom alfalfa and immature timothy hay at the height of its nutritional value.

Triple Crown Forage Cubes offer the horse owner a way to supplement or replace hay and pasture supplies while eliminating the concerns for nutrition, availability and potential respiratory problems arising from bad forage supplies. Plus, forage cubes have proven to be about 15% to 20% more efficient to feed than long stem hay.

Triple Crown Premium Forage Cubes use pre-bloom alfalfa and immature timothy hay at the height of its nutritional value. The heat produced during the cubing process virtually eliminates dust, mold, and fungus.

Ingredients

ALFALFA CUBES

Pre-bloom, dehydrated alfalfa cubed to 1 1/4 inches in diameter. Provides improved digestible energy with a high protein content. Packaged in 50 lb. bags. (Free from Restricted Ruminant Protein Products per Title 21, CFR 589.2000/2001)

ALFALFA — TIMOTHY CUBES

Pre-bloom, dehydrated alfalfa blended with immature timothy hay and cubed to 1 1/4 inches in diameter. Contains 50% Alfalfa and 50% Timothy hay. Reduced protein and energy compared to 100% alfalfa. Packaged in 50 lb. bags. (Free from Restricted Ruminant Protein Products per Title 21, CFR 589.2000/2001)

Feeding Directions

If replacing all the hay in the diet, feed 1% to 1 1/2% of body weight per day. If feeding as a supplement to hay, feed 4 to 6 lbs. of cubes per day. Cubes can be soaked in warm water to loosen for older horses with bad teeth or for horses prone to choking. Store cubes off the floor and out of direct sunlight. Because fiber consumption encourages drinking, always provide plenty of fresh, clean water at all times.

NOTE: Keep product fresh in cool, dry storage. Examine product daily for mold or insect contamination. DO NOT use product that is old, molded or insect contaminated.
