

Triple Crown Omega Max

A stabilized golden flax supplement for horses.

Triple Crown Omega Max is a 100% Ground Golden Flax that is processed under a proprietary method to guarantee a shelf life of 2 years. While we continue to learn more about the benefits of Omega 3 fatty acids, it is widely accepted that they are necessary and beneficial to horses, especially those horses with limited access to green grass. Flaxseed has the highest level of Omega 3 fatty acids next to Fish Oil.. Omega 3 fatty acid supplementation in horses has been shown to improve immune function, hair and hoof condition, reduce inflammation in exercised horses and may offer some benefits for reduced inflammation due to arthritis for older horses.
