Feeding Directions:

Triple Crown 30% Ration Balancer can be used to balance pasture and/or hay, improve nutrition in diets when feeding small amounts, or to mix with your own grains for a balanced diet. Adjust feed, pasture or hay to maintain desired body condition.

For balancing pasture and/or hay: feed 1-1.5 lb. per 1,000 lb. of body weight. Feed 0.5 -.75 lb. for ponies. For horses in moderate to high levels of activity, and for broodmares and breeding stallions, feed 1.5-2 lb. per day.

For balanced diets where current feeding rates fall below the minimum for that diet: add 0.5-1 lb. per 1,000 lb. of body weight along with the diet being fed. Feed 0.25-0.5 lb. for ponies. For horses in moderate to high levels of activity, and for broodmares and breeding stallions, feed 1 lb. per day.

When mixing with your own grains (oats, corn or barley): mix at a ratio of 1:4.5 of Triple Crown 30% Ration Balancer along with your grains and add molasses, if desired, for palatability and consistency.

NOTE: Provide plenty of fresh, clean water at all times. Keep product fresh in cool, dry storage. Examine product daily. DO NOT use if old, moldy or contaminated with insects.
