

TRIPLE CROWN®

TOTAL LIFETIME CARE

12.5% Protein • 8% Fat • 18% Fiber • 16.7% NSC • 1,550 KCAL/lb.

Triple Crown Total Lifetime Care is a pelleted diet for horses of any age, from foals to senior horses, fortified to provide protein, essential amino acids, vitamins, macro minerals, trace minerals, bacteria and enzymes

IDEAL FOR: Providing proper nutrition for horses of all ages in order to simplify feeding

Guaranteed Analysis:

Crude Protein (min.)	12.50%	Iron (min.)	190 ppm
Lysine (min.)	0.65%	Manganese (min.)	115 ppm
Methionine (min.)	0.15%	Cobalt (min.)	0.21 ppm
Threonine (min.)	0.35%	Vitamin A (min.)	5,750 IU/lb.
Crude Fat (min.)	8.00%	Vitamin D (min.)	1,000 IU/lb.
Omega-3 Fatty Acids (min.)	0.41%	Vitamin E (min.)	165 IU/lb.
Omega-6 Fatty Acids (min.)	3.90%	Riboflavin (min.)	3.70 mg/lb.
Crude Fiber (max.)	18.00%	Thiamin (min.)	10.5 mg/lb.
Calcium (min.)	0.90%	Biotin (min.)	0.25 mg/lb.
Calcium (max.)	1.40%	Ascorbic Acid (min.)	40 mg/lb.
Phosphorus (min.)	0.60%	Saccharomyces Cerevisiae Yeast Culture (min.)	1.816 billion CFU/lb.
Magnesium (min.)	0.45%	Lactobacillus Acidophilus Fermentation Product (min.)	908 million CFU/lb.
Potassium (min.)	0.80%	Enterococcus Faecium Fermentation Product (min.)	908 million CFU/lb.
Copper (min.)	55 ppm	Cellulase (Trichoderma Longibrachiatum) (min.) *	0.68 million CU/lb.
Selenium (min.)	0.50 ppm	Protease (Bacillus Subtilis) (min.) **	1,430 HUT/lb.
Zinc (min.)	180 ppm		

*One cellulase unit (CU) is defined as the amount of activity that will produce a relative fluidity change of 1 (determined with a calibrated viscometer) in 5 minutes in a defined carboxymethylcellulose substrate at pH 4.5 and 40°C

** One hemoglobin unit (HUT) of proteolytic (protease) activity is defined as that amount of enzyme that produces, in one minute under the specified conditions, a hydrolysate whose absorbance at 275nm is the same as that of a solution containing 1.10g per mL of tyrosine in 0.006N hydrochloric acid.

Ingredients:

(Free from Restricted Ruminant Protein Products per Title 21, CFR 589.2000/2001)

Wheat Middlings, Soybean Hulls, Shredded Beet Pulp, Soybean Oil, Cane Molasses, Dehydrated Alfalfa Meal, Distillers Dried Grains, Ground Limestone, Flaxseed, Stabilized Rice Bran, Calcium Carbonate, Vitamin E Supplement, Salt, Lignin Sulfonate, Sodium Bicarbonate, Dicalcium Phosphate, Yeast Culture, Hydrolyzed Yeast, Hydrated Sodium Calcium Aluminosilicate, Dried Lactobacillus Acidophilus Fermentation Product, Dried Enterococcus Faecium Fermentation Product, Anise Seed, Fenugreek Seed, Dried Trichoderma Longibrachiatum Fermentation Extract, Dried Bacillus Subtilis Fermentation Extract, Zinc Proteinat, Manganese Proteinat, Kelp Meal, Copper Proteinat, Lecithin, Magnesium Oxide, Iron Proteinat, Magnesium Proteinat, Selenium Yeast, L-Lysine, Ascorbic Acid (Source of Vitamin C), Niacin Supplement, Biotin, Vitamin A Supplement, Thiamine Mononitrate, Beta Carotene, Calcium Pantothenate, Riboflavin Supplement, Pyridoxine Hydrochloride, Vitamin B12 Supplement, Vitamin D3 Supplement, Choline Chloride, Menadione Sodium Bisulfite Complex (Source of Vitamin K Activity), Folic Acid, Sodium Aluminosilicate, Calcium Aluminosilicate, Manganese Sulfate, Brewers Dried Yeast, Ferrous Sulfate, Zinc Sulfate, Copper Sulfate, Cobalt Sulfate, Ethylenediamine Dihydroiodide, DL-methionine, (Propionic Acid, Sodium Benzoate, Potassium Sorbate (Preservatives)).

Feeding Directions:

Triple Crown Total Lifetime Care is designed to provide the proper nutrition for horses of all ages in order to simplify feeding for multiple ages of animals. Feed 5-6 lb. per day for a mature 1,000 lb. horse as a minimum to receive adequate intake of vitamins and minerals. Adjust amount fed up or down to maintain desired body condition. If feeding less than 5 lb. per day, we recommend either changing to or supplementing the diet with 1 lb. of Triple Crown 30% Balancer or Triple Crown Lite. For ponies, cut the amount in half.

FEEDING YOUNG HORSES: Feed 1% of body weight to foals up to 400 lb. For weanlings and older, the amount fed daily should be adjusted to maintain a moderate body condition. Start with 5-6 lb. per day divided into multiple feedings and then adjust up or down depending on the need for individual horse to maintain desired body condition. If feeding less than 5 lb. per day, supplement with 1 lb. of Triple Crown 30% Balancer to insure adequate vitamin and mineral intake. For ponies, cut amounts in half.

FEEDING SENIOR HORSES: If horses can still eat hay and/or pasture, feed 5-6 lb. per day for a mature 1,000 lb. horse as a minimum to receive adequate intake of vitamins and minerals. Adjust amount fed up or down to maintain desired body condition. If feeding less than 5 lb. per day, we recommend either changing to or supplementing the diet with 1 lb. of Triple Crown 30% Balancer or Triple Crown Lite. For ponies, cut amounts in half.

For senior horses with damaged or worn teeth who can no longer or have trouble eating hay or pasture, Triple Crown Total Lifetime Care can be fed as the sole diet for your horse. Begin with approximately 12-15 lb. per day and adjust up or down as needed to maintain desired body condition. Feeding these horses multiple times and out of a bucket on the ground is preferable. Water may also be added to the feed to help soften for these horses with compromised teeth. For ponies, cut amounts in half.

NOTE: Provide plenty of fresh, clean water at all times. Keep product fresh in cool, dry storage. Examine product daily. DO NOT use if old, moldy or contaminated with insects.
