

STRESSFREE™

FORTIFIED FORAGE SUPPLEMENT

A forage based digestive balancer to reduce your worry and keep your horse eating.

RESEARCH INDICATES GASTRIC DISCOMFORT HAPPENS QUICKLY.

According to a study published in the Journal of the American Veterinary Medical Association horses that were transported and housed off-site had a significantly higher incidence of hyperkeratosis and reddening of the gastric mucosa than control horses. Activities that are typical in recreational use of horses were ulcerogenic, and ulcers in the gastric squamous mucosa can develop under these conditions within 5 days. (*J Am Vet Med Assoc 2005;227:775-777*)

- ✓ A highly palatable forage balancer that will help keep your horse eating
- ✦ Goes beyond with a slow release butyric acid to support normal health and function of the digestive tract
- ✂ Pre & probiotics to improve the microbial population and aid with digestive balance
- 🍷 Flaxseed oil for Omega-3 fatty acids, and peppermint essential oil for palatability
- 🌿 Made with chopped alfalfa, which is high in calcium and may have natural buffering effects
- ➡ Feed 2-4 lb. per day; a little goes a long way

COMMON REASONS TO SUPPLEMENT FORAGE TO KEEP A HORSE EATING:

- Trailing
- Performing
- Change in weather
- Separation
- Co-mingling
- General anxiety
- Change in diet
- New environment
