BALANCER GOLD

PELLET

50 LBS
(22.7 KG)

IDEAL FOR:
Overweight horses, ponies, miniature horses, metabolic horses

FEATURES:
Whole grain, soy & molasses free, gastric buffering, whey protein/amino acid balance, added chromium

HELPS SUPPORT:
Balancing hay & pasture, feeding grains below recommended feeding rate, strong top line, insulin sensitivity, managing inflammation and heat stress

IMMUNITY EquiMix GUT HEALTH

NOW WITH

- More probiotics via CLOSTAT® to support a healthy microbiome
- Zinpro® Performance Minerals® with higher bioavailability

1. One cellulase unit (CU) is defined as the amount of activity that will produce a relative fluidity change of 1 (determined with a calibrated viscometer) in 5 minutes in a defined carboxymethylcellulose substrate at pH 4.5 and 40°C.

2. One hemoglobin unit (HUT) of proteolytic (protease) activity is defined as that amount of enzyme that produces, in one minute under the specified conditions, a hydrolysate whose absorbance at 275nm is the same as that of a solution containing 1.10g per mL of tyrosine in 0.006N hydrochloric acid. Estimated values determined by Equi-Analytical, Ithaca, NY.

The above feeding recommendations assume a horse is consuming a minimum of 1.50 to 2% of its body weight in hay or pasture for appropriate vitamin/mineral fortification according to body weight. Horse's needs may vary based on age, work level, metabolism, weather and other factors.

For desired body condition, adjust the amount of forage or unfortified concentrate inclusion (oats, corn, barley, rice bran, beet pulp) up or down to adjust caloric intake. If more than the recommended amount of Triple Crown Balancer Gold is needed to maintain body condition, consider switching to Triple Crown Lite or adding a Triple Crown performance or senior feed.

NOTE: Provide salt and plenty of fresh, clean water at all times. Keep product fresh in cool, dry storage. Examine product daily. DO NOT use if old, moldy or contaminated with insects.

CAUTION: Follow label directions. Chromium from all sources of supplemental Chromium cannot exceed 4 mg per horse per day. Feeding added Selenium at levels in excess of 0.30 ppm in the total diet is prohibited. Triple Crown Balancer Gold does not exceed an intake of 3 mg of added Selenium per head per day when fed as directed. Product contains Copper; do not feed to sheep.
