Feeding Directions:

Triple Crown Lite is designed to be a palatable feed for horses that will provide a desired intake level of supplemental minerals and vitamins without encouraging excessive weight gains. Triple Crown Lite should be fed to horses that have a tendency to become overweight or are receiving less than 4 lb. of grain per day. Triple Crown Lite should be fed in combination with hay and/or pasture, salt, and fresh, clean water. If your horse is being fed more than 5 lb. of grain daily in order to maintain desired body condition, Triple Crown Lite is not recommended.

MATURE HORSES: Feed 1-2 lb. of Triple Crown Lite per 500 lb. of body weight per day. If more than 4 lb. of Triple Crown Lite is required to maintain the horse's desired body condition a switch to another Triple Crown formulation such as Low Starch may be necessary.

PONIES AND MINIATURE HORSES: Feed 1 lb. of Triple Crown Lite per 500 lb. of body weight and adjust feeding rate to maintain desired body condition.

CAUTION: In order to avoid excessive mineral and vitamin intake, DO NOT feed more than 5 lb. of Triple Crown Lite per day. Chronic intake of excess minerals and/or vitamins can adversely affect the health of your horse.

NOTE: Provide plenty of fresh, clean water at all times. Keep product fresh in cool, dry storage. Examine product daily. DO NOT use if old, moldy or contaminated with insects.
