## FEEDING DIRECTIONS

### TO SUPPLEMENT HAY/PASTURE

1,000 lb. horse 4 – 6 lb. per day

### TO REPLACE FEED/GRAIN

1,000 lb. horse 10 lb. per day

### TO USE AS A COMPLETE DIET

## OTHER CONSIDERATIONS

Product can be mixed with water to aid in hydration. Product may be mixed with the grain portion of the diet to slow rate of intake.

When feeding as a replacement to feed/grain, should be fed in combination with a minimum of 0.50% of body weight in additional hay/pasture so that your horse is getting a minimum of 1.50% body weight in forage.

Provide salt and plenty of fresh, clean water at all times. Keep product fresh in cool, dry storage. Examine product daily. DO NOT use if old, moldy or contaminated with insects.

**CAUTION:** Follow feeding guidelines. Feeding added Selenium at levels in excess of 0.30 ppm in the total diet is prohibited. Contains added Copper; do not feed to sheep.

**AGRICULTURE STATEMENT:** Forage is a natural agricultural product. Despite the use of modern processing equipment, it is not always possible to remove foreign materials.
